The Title, in Mixed Case, Without Acronyms

Iam D Author, Heis A Too, Also I Diddit

National University of Elbonia
Somewhere, Elbonia

This example of a *Computing in Cardiology* program abstract was prepared from a LaTeX template. A program abstract should be similar to a mini-paper, with an introduction (why is the problem worth studying?), methods, results, and, if the results do not speak for themselves, a conclusion. It **must** fit on a single 140x215 mm page in a 110x180 mm rectangle, including the title block. The title and authors are in 12 and 10 point Helvetica, respectively, and the abstract body is in 10 point Times Roman.

Waveform boundaries, as estimated by participants in the Challenge.

The abstract can include equations, a figure, or a table. Be sure that the abstract is legible in black and white, and that any included text is no smaller than 6 points. Look at the template to see how the figure, equations, and table were included in it. These elements should be used sparingly if at all, and it is not recommended to include all three, as this example does. Equations can be included:

$$RR_i = a_0 + a_1 \sin(\omega_1 t_i + \phi_1) + a_2 \sin(\omega_2 t_i + \phi_2) + a_3 z \qquad (1)$$

$$t_{i+1} = t_i + RR_i \qquad (2)$$

and mathematical expressions can also be incorporated in the text. For example, RR_i above is the RR interval beginning at t_i, z is a random variable evenly distributed between -1 and 1, and the other parameters are arbitrary constants.

Results of the Challenge		
Division	Best	Typical
Manual	6.67 ms	10-20 ms
Automated	16.34 ms	20-30 ms
Open-Source	17.33 ms	20-30 ms

Captions go beneath figures, but above tables. An abstract should not include footnotes or a bibliography.

Conference program abstracts are normally due on or before 15 April each year, a deadline that is occasionally shifted a few days if another major conference coincides with 15 April. Check the Call for Papers for this year's conference to confirm the date of the deadline. All submitted abstracts are reviewed in late May or early June, and authors are notified by mid-June if their abstracts have been accepted.
